

Missing Box examples and steps to solve:

$8 + \square = 19$
 P P W

19	
8	

1. Identify where your **whole** and **parts** are.
2. Put it into a part part whole model.
3. Decide whether you need to use **addition** or **subtraction** to solve the equation
4. Solve the equation

$19 - 8 = 11$

Addition: Part + Part = Whole

Subtraction: Whole - Part = Part

$W \quad \quad P \quad \quad P$
 $27 \quad - \quad \square \quad = \quad 14$

27	
14	?

$27 - 14 = 13$

$W \quad \quad P \quad \quad P$
 $\square \quad - \quad 13 \quad = \quad 25$

?	
13	25

$25 + 13 = 38$
