

Make up your own maths story about a number bond to 10:

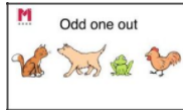

Can you write all the 11 subtraction equations with 10 as the whole?

Key Learning: number bonds to 10

Deepening

Which of these is the odd one out and NOT a number bond to 10?

$9 + 1$

$5 + 6$

$0 + 10$

$8 + 2$

Miss Hughes said “An odd number add an even number can total 10.”

Explain why Miss Hughes is **incorrect** with 3 example equations.
