

Key Learning: To identify the names and properties of 2D Shapes

14.3.22

Success Criteria:

- I can recognise, recap and name the 2D shapes
- I understand what sides and vertices are
- I can count the number of sides and vertices accurately

Deepening: How many sides/vertices, Spot the error, Circle the shape, Identify the shape

Success Criteria: I / PS / FS

Independent
task

Stick each shape in the correct box.

I have 1 side and 0 vertices	I have 3 sides and 3 vertices	I have 5 sides and 5 vertices
I have 2 long sides, 2 short sides and 4 vertices	I have 4 equal sides and 4 vertices	I have 8 sides and 8 vertices
