

Teddy's 3D shape has 6 faces.
Jack says he must have a cube.
Is Jack correct? Explain your answer.

Whitney says,

I have a 3-D shape with
2 square faces and 4
rectangular faces.

What shape is Whitney thinking of?

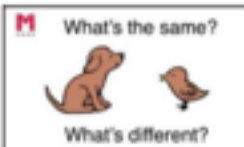

Key Learning: to identify
the properties of 3D shapes.

Deepening

Only one of these shapes has five faces.

Explain your answer.

Look at the two shapes.

What is the same?

What is different?
