

What hungry animals they are!

The main types of food that Emperor penguins eat are krill, fish and squid. They are expert divers and swimmers so that they can hunt their prey from the sea. Like other penguins, they have a rough and spiky tongue. This helps them when trying to eat slippery fish!

Formal language	Informal language
Habitat	home
Prey	eaten by others
Herbivore	plant eater
Mate	friend
Carnivore	meat eater
Predator	eats other animals
