

## Week commencing 21.6.2020

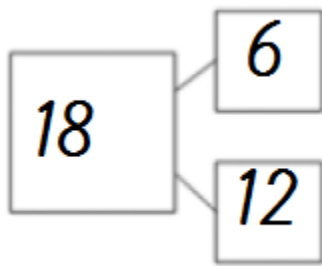

This week children are learning to subtract with numbers to 100.

Lesson 1, 2 and 3 – practising the subtraction method

Lesson 4 – Save James from his evil Aunts with a crack the code challenge.

### Guide to the subtraction method.

We use the part part whole model to show children the relationship between numbers. Children draw the whole number (The largest number in the big box) and cross off the number of a part.

$$18 - 6 = 12$$

#### Step by step method.

1. Draw 18
2. Cross off 6
3. Count what is left.
