

The Earth Scorcher Dragon

What does it look like?

The earth scorcher dragon has fiery red skin and a long scaly tail. She has enormous wings that she uses when she is soaring through the sky. The earth scorcher breaths roasting hot flames when she is threatened so don't get too close! Her reptilian claws are perfect for catching her prey. She is not the biggest dragon but she is the cleverest!

Watch out for the fearsome Earth Scorcher!

Where does it live?

The earth scorcher lives in the tall mountains. Her lair is a dark, gloomy cave. The earth scorcher makes her home near to fields with cows and sheep so that she can eat them for her lunch! She snatches them up with her sharp claws and takes them back to her home. The farmers are desperate to catch her in the act but she is too clever and too quick! Can you help them to find this terrifying dragon?
